RECMEDIATION, INC.

Turnkey Environmental and Demolition Services

Qualifications Statement

MISSION STATEMENT

Recmediation, Inc. is a nationwide corporation specializing in demolition and environmental services.

We strive to meet the following principles:

- Provide complete, safe and efficient demolition and environmental services to our clients
- Conduct these operations utilizing our engineering resources, vast experience in the industry and professional employees with the highest regard for safety and health
- Complete complex projects cost-effectively and on-time while meeting the highest quality standards

Through a focused, long term commitment to this mission, we have established ourselves as a company that understands the myriad of regulations and laws, comprehends strict adherence to safety and health, and understands the needs of our clients and the commitment necessary to be successful.

Our commitment to excellence and safety has allowed us to work with Fortune 500 and top ranked ENR corporations including E.I Dupont de Nemours & Company, Inc., BASF, Honeywell, Bayer, Pfister Chemical, ISP, Hercules, Enviro-Sciences, and O'Brien & Gere to name a few.

VAN R. LEWIS
PRESIDENT

NATIONWIDE SERVICES

Recmediation, Inc. provides the following services on a nationwide basis utilizing open shop or union labor, depending on the client's needs or location:

- | | |
|---|---|
| <ul style="list-style-type: none"> • Total Demolition • Interior Demolition • Selective Dismantlement • Rigging | <ul style="list-style-type: none"> • Demolition & Dismantlement • Remediation • Plant Decommissioning • Decontamination • Hazardous Waste Management • Brownfield Redevelopment Support • Environmental Engineering & Excavation |
| <ul style="list-style-type: none"> • Investment Recovery • Investment Recovery • Asset Recovery • Surplus Equipment and Materials | <ul style="list-style-type: none"> • Abatement • Asbestos Abatement • Lead Abatement |

DEMOLITION & DISMANTLEMENT

- Total Demolition • Interior Demolition
- Selective Dismantlement • Rigging

Please consider *Recmediation, Inc.* for your demolition and dismantlement needs if one or more of the following conditions apply:

- The site is severely distressed or it is deemed obsolete
- The site is unsuitable for current usage
- Design or construction deficiencies make rehabilitation of the facility cost prohibitive
- Continued operation would be a substantial burden
- The current condition of the building poses liabilities

Our skilled demolition teams can perform the following: demolish an entire building, demolish sections of a structure, demolish building interiors (gut-out) and dismantle structures of all sizes and shapes. Many jobs involve a combination of several of our services. *Recmediation, Inc.* can also rig or dismantle large structures, towers, tanks, pipes, and equipment. We handle rigging from one piece of equipment to an entire plant and have the necessary equipment and knowledge to handle projects of all sizes.

REMEDIATION

- Plant Decommissioning
- Hazardous Waste Management
- Environmental Engineering
- Decontamination
- Brownfield Redevelopment Support
- Excavation

Recmediation, Inc. is a leader in remediation services. If you are closing or renovating a facility, Recmediation, Inc. offers a complete decommissioning service including:

- Development of a work plan by in-house engineering staff which documents proper means and methods
- Decontamination of building including cleaning of tanks, vessels, pipe, etc. with high pressure washing or other means as necessary
- Management of hazardous wastes generated and proper transportation and disposal
- Excavation of subsurface contamination and hot spots

INVESTMENT RECOVERY

- Investment Recovery
- Asset Recovery
- Surplus Equipment and Materials Sales
- Scrap Metal Sales

Recmediation, Inc. can assist with selling various items including equipment, machinery, other assets or salvaging scrap metals. This could potentially create a substantial cost reduction on your project.

ABATEMENT

- Asbestos Abatement
- Lead Abatement

Abatement is defined as the removal, encapsulation, enclosure, renovation, repair, demolition or other disturbance of asbestos or lead containing materials.

200+ ft concrete stack implosion.

RECMEDIATION, INC.

Turnkey Environmental and Demolition Services

Qualifications Statement

RECMEDIATION® APPROACH

We provide the services described above through the *Recmediation*® methodology. *Recmediation*® is the method of synergistically combining our vast experience and resources, described within this qualification package, to provide effective and safe turnkey services.

A typical project for *Recmediation, Inc.* involves numerous environmental and safety concerns (hazardous waste, PCB transformers, asbestos/lead, active process lines, etc.), budgetary constraints, and expedited schedules.

The *Recmediation*® approach is as follows:

- We analyze the project scope, hazards and concerns
- After a thorough engineering analysis, we evaluate the best approach to the project and when possible, cost saving alternates for the client
- Develop appropriate plans (H&S Plan, Detailed Work Plan, Engineering Survey, etc.)
- Assign the most qualified individuals to the project team and mobilize the necessary equipment
- Implement the plans focusing on safety and efficiency

This is a dynamic approach where we constantly re-evaluate the work efforts to determine possible cost saving alternatives. Through this unique approach, we are able to provide the highest quality services to our clients.

BUDGETS AND COST ESTIMATING

Recmediation, Inc. has the capability to prepare budgets and proposals at early stages of a project. These initial budgetary proposals can be modified as additional project information is obtained from the client. To provide accurate estimates, our experienced staff utilize not only their vast personal knowledge acquired through years of real world experience, but also historical cost data, internet data base information, and software programs.

IN-HOUSE ENGINEERING

Recmediation, Inc. is authorized by the New Jersey State Board of Professional Engineers and Land Surveyors to provide engineering services. Our in-house capabilities for engineering services separate us from other one-dimensional demolition companies. We utilize our engineering services to perform:

- OSHA engineering inspection
- Assessment of hazardous materials and hazardous conditions and development of engineering solutions
- Develop Site Specific Work Plan and Health and Safety Plan
- Analyze proper means and methods
- Develop cost saving alternatives

A copy of our Certificate of Authorization for Engineering (GA 278973) is available upon request.

Joseph J. Kunigonis
Reclamation, Inc.
31A East Railroad Ave.
Jamesburg, NJ 08831

Dear Mr. Kunigonis:

The Decontamination & Dismantlement (D&D) Group at Chambers Works was very satisfied with the work performed by Reclamation, Inc. in 2000 and 2001. During this period six, (6) demolition projects were completed. All work was completed on schedule and without injury or environmental incident. One project involved the RCRA Closure of a facility. Reclamation, Inc. developed and implemented cleaning and sampling protocols that led to successful closure and demolition of the facility.

George Manogue and his work crew demonstrated that they are experienced and professional workers. This crew developed an excellent working relationship with the D&D team, which resulted in a safe and effective projects.

Reclamation, Inc. was recognized by the site as 2001 DuPont Contractor of the Year and, also, given the 2001 DuPont Safety Award for exemplary performance.

Sincerely,

A handwritten signature in cursive script that reads "Larry O. Curtis".

RE: Remediation, Inc.

Dear Sir or Madam,

HazTek, Inc. has worked extensively with the principle owners of Remediation, Inc. over the past several years. Our experience has shown that they consistently exhibit a commitment to safety that is far beyond what is typically seen in our industry.

As an environmental, health and safety consulting firm, we have the opportunity to view the work practices of dozens of contractors. Remediation's dedication to their safety program and their "zero tolerance" policy puts them among the most safety conscious contractors we have seen.

Perhaps most important is Remediation's proactive approach to updating and improving their safety program. On the numerous projects where we have worked together, Remediation has not experienced a single recordable or lost time injury. Despite this, they continually seek advice on ways to enhance their safety policies and procedures.

It is always a pleasure working with Remediation. If we can be of any further assistance, please feel free to contact us directly.

Sincerely,

Steven E. Jones
Managing Partner

RECMEDIATION, INC.

Turnkey Environmental and Demolition Services

Qualifications Statement

AWARDS

2002

For the second year in a row, we were awarded *DuPont's Safety Award for Zero Recordable Injuries at the Chambers Works Site.*

Recmediation, Inc. won the 2002 Gold Medal Business Achievement Award in the under \$20 million category from the Environmental Business Journal. The EBJ examined nearly one hundred firms nominated for the award, and chose only the firms that were truly worthy of recognition.

AWARDS

2001

Recmediation, Inc. was awarded the **2001 Contractor of the Year** by **E.I. Du Pont de Nemours and Company, Inc.** The award is based upon *Recmediation, Inc.*'s outstanding safety program and exemplary performance.

DuPont also awarded *Recmediation, Inc.* the **Safety Award for Completing 2001 with Zero Recordable Injuries.**

In addition, it should be noted that our outstanding safety record has earned us the very prestigious **Platinum Safety Award** from our multi-peril insurance carrier, **The Ohio Casualty Group**. This award is bestowed upon less than 1/2 of 1% of all commercial accounts.

CORPORATE CREDENTIALS

COMMITMENT TO QUALITY

Recmediation, Inc. takes pride in our performance, our professionalism, and our commitment to delivering a quality service. Our commitment to these goals has enabled *Recmediation, Inc.* to develop long-lasting relationships with our clients.

Our technical resources supplement our quality driven work ethic. *Recmediation, Inc.* utilizes the latest scheduling and project management software applications to:

- Maintain strict control of every aspect of a project;
- Develop and maintain accurate documentation and records;
- Provide an accurate assessment of project schedule; and
- Be proactive in developing quick solutions to any potential project issues.

As is evidenced in our corporate references, *Recmediation, Inc.* has completed large, complex projects throughout the country. Our commitment to quality in every phase allowed each project to be completed safely, on schedule, within budget, and to the owner's and our own high standards of excellence.

COMMITMENT TO SUPERIOR CLIENT SERVICE

Recmediation, Inc. offers superior client service to its valued customers. You will notice in your very first contact with *Recmediation, Inc.*, that each client is very important and is treated with utmost courtesy and respect.

Recmediation, Inc. is the right size to service your needs. We are large enough to complete multi-million dollar projects, yet we maintain personal contact from project start to finish.

Recmediation, Inc. features an experienced staff of corporate officers with an average of about 20 years experience and project managers with an average of 15 or more years experience. These employees are very knowledgeable and responsive to the needs of our customers.

Any issue that is important to you is just as important to us. Be assured that your questions will be immediately addressed and answered.

We will not deviate from our own and our clients's high standards of excellence.

Qualifications Statement

PROFESSIONAL MANAGEMENT & STAFF

Recmediation, Inc. separates itself from other companies by our professional, experienced and safety oriented personnel. A dedicated project team is assigned to each of our client's projects, which consists of corporate, management and field supervisory personnel. The team is committed to completing the project in the most economical and efficient manner while keeping safety as priority one. A brief description of typical team positions is as follows:

PROJECT MANAGER

Our Project Managers have a minimum of 10 years experience in managing large-scale demolition, environmental and remediation projects. Their responsibilities include: Allocating resources, equipment and manpower to the project; Track project costs, personnel and equipment with Management/Schedule/Job Cost Software; Assist in development of Site Specific H&S Plan and Work Plan; Close interaction with client throughout project; Maintain an efficient and safe work environment; Ensure that subcontractors comply with project specifications, HASP and Work Plan; Assist with weekly and daily tailgate meetings; Conduct periodic safety inspections and report result directly to Corporate Safety Officer.

SITE SAFETY OFFICER

Our site safety officers are responsible for assuring that the Site HASP and Work Plan are understood and implemented by *Recmediation, Inc.* personnel and subcontractors at all levels. Each will be responsible for keeping daily logs and administering monetary safety incentive programs. They will answer directly to the project manager.

SUPERINTENDENTS & FOREMAN

Superintendents and Foremen are assigned to projects based upon the size and complexity of the job. Large project may be assigned a superintendent and two foremen, while small projects may only be assigned a superintendent. The superintendent will always be a full time site contact with responsibility for onsite resource allocation, material purchasing and daily cost tracking. The superintendent's responsibilities include project planning to assure all crews work safely and efficiently; conduct daily tailgate safety meeting to facilitate discussion of each work area's daily activity schedule; direct the foreman how to train their crews in safe and healthful working practices; stop work to correct hazards that present a danger to the crew or equipment; stop unsafe acts of workers immediately and teach them the safe way of doing the same operation; and prepare accident reports and complete a detailed accident investigation on the proper forms.

WORK CREW

Our field supervisory personnel are OSHA trained and experienced in the proper demolition and environmental methodologies. Each and every crew member is required to understand the Corporate Health & Safety program along with site specific plans. Any safety issues or potential hazards are to be immediately reported to a supervisor. In addition, employees are to report all injuries, no matter how minor, or accidents to their supervisor immediately. They also have to know where the first aid, fire fighting equipment and other safety equipment are located.

SUBCONTRACTORS & SUPPLIERS

Subcontractors and their employees are bound by and to the same safety and health requirements. It is the responsibility of all to make sure the subcontractors comply with and uphold the Safety and Health Program. All subcontractors will be required to attend the weekly and daily tool-box safety meetings and report any incidents to the superintendent.

Roosevelt Roads Naval Station, Ceiba, PR	Assistant Project Manager/Senior Operator
DuPont, SC	Safety Officer/Manager

CORPORATE RESUME

BRUCE HENDERSON, CET
Project Manager/Safety Manager

PROFESSIONAL PROFILE

Mr. Henderson has over 12 years experience as a safety professional demonstrating competency in the fields of occupational health and safety, industrial hygiene, environmental remediation, hazardous waste management and construction safety. He is an OSHA Authorized Instructor for conducting 10-Hour and 30-Hour Outreach Training in the area of Construction Safety and Health. He has assisted multiple clients with acquiring OSHA Star VPP status, including sites at a major oil refinery and power generation plant. He is a Certified Environmental Trainer who has conducted well over 200 training classes, instructing more than 4,000 students, in various safety, environmental and regulatory compliance issues. He has managed overall site safety on numerous Superfund Sites, Army Corps of Engineers projects and major construction sites.

EDUCATION

Rutgers University, Cook College, New Brunswick, NJ
B.S. – Environmental Science and Pollution Treatment Sciences

SPECIAL TRAINING

OSHA 40-hour Hazmat, OSHA 8 hr Supervisor
Certified Environmental Trainer in the area of Occupational Safety and Health (Cert. # 96-528)
Confined Space Entry and Confined Space Rescue Trained
First Aid / CPR Trained and DOT HM - 215
Emergency Spill Response – Incident Commander

PROFESSIONAL AFFILIATIONS

Member of National Environmental Training Association
OSHA Authorized Instructor for Construction Safety & Health
Member of New Jersey Chapter American Industrial Hygiene Association

REPRESENTATIVE PROJECTS

Mr. Henderson has developed and implemented Safety Programs and Industrial Hygiene Programs on a wide variety of environmental remediation sites, major construction sites and industrial facilities. Additionally, he has prepared a number of Corporate Safety and Environmental Policies and Procedures. Due to his exemplary site safety record and vast experience with many potentially hazardous situations, Mr. Henderson is well respected and widely consulted on how to handle the most challenging safety situations. The following is a general list of Mr. Henderson's areas of expertise:

Hazardous Waste Handling & Management; Contaminated Soil Excavation; Transportation, and Disposal; Construction and Demolition Safety; Industrial Hygiene Monitoring and Interpretation of Analytical Data; Industrial Safety Compliance; Lead Paint Abatement; Selection and Use of PPE.

CORPORATE RESUME

MIKE FORD
Project Manager

PROFESSIONAL PROFILE

Mr. Mike Ford has over 15 years of experience in the demolition, dismantlement, and decontamination industry. As project manager, Mr. Ford has overall responsibility of the daily operations on the project site which include, but are not limited to, managing project personnel and subcontractors, client interaction, scheduling of necessary resources, maintaining project schedule and goals, enforcing the corporate health and safety program, perform daily safety checks, conduct toolbox talks and ensure safety guidelines are being implemented. Mr. Ford reports directly to Mr. Van Lewis & Mr. Damon Kozul.

SPECIAL TRAINING

OSHA 40-hour Hazmat, OSHA 8 hr Supervisor
First Aid & CPR
Dupont Pin/OSHA
Heavy Equipment & Crane Training
Confined Space
Asbestos Awareness
Lead Awareness

RELEVANT EXPERIENCE

- Experienced operator capable of running any type of heavy equipment including dozers, excavators, skid steer, etc.
- Experienced in completing complex projects involving hazardous wastes and materials.
- Manages Recmediation, Inc. plant maintenance and millright operations.
These operations include:
 - First Line Breaks
 - Hazardous materials removal and segregation
 - Heavy Rigging
 - All operations are conducted within an active chemical plant & around live utilities

CORPORATE RESUME

JOHN P. HANLEY
Operating Engineer/Supervisor

PROFESSIONAL PROFILE

Mr. Hanley has over 21 years in the demolition/dismantling field. Mr. Hanley is capable of organizing and managing projects large and small. He is also an operating engineer experienced on excavators, loaders, backhoes, compaction equipment, dozers and cranes.

SPECIAL TRAINING

**OSHA 40-hour Hazmat, OSHA 8 hr Supervisor
Heavy Equipment Operation**

EDUCATION

High School Graduate

REPRESENTATIVE DEMOLITION PROJECTS OPERATOR/SUPERVISOR

DuPont – Toledo, OH	Demolition of (10) Buildings
DuPont Chambers Works – Deepwater, NJ	Demolition of various process buildings
Givaudan – Clifton, NJ	Demolition of entire (100) acre plant.
Hoffman-LaRoche - Nutley, NJ	Demolition of various buildings
CK Witco – Brooklyn, NY	Demolition of entire plant
DuPont Grasselli Works – Linden, NJ	Demolition of entire plant
Dupont SC	Demolition of numerous structures & buildings
Pfister Chemical – Ridgefield NJ	Demolition of entire plant

SAFETY AND HEALTH

RECMEDIATION, INC.

Recmediation, Inc. regards safety and health as an important component of every job and paramount to the success of the company. Our employees are our company's greatest assets and it is our responsibility to protect their health and welfare. We have therefore structured our safety program to meet a goal of zero accidents. At Recmediation, Inc., safety is everyone's responsibility from corporate to management and every employee.

Our "Zero Tolerance" safety policy is not just a saying, but also a firm obligation to our clients to provide trained personnel who are dedicated to safe work procedures. By implementing Pre-Task Planning, Drug Testing, Worker Training, Accident Investigations and Safety Incentives, we are able to achieve an exemplary safety record.

Our comprehensive Corporate Safety Program consists of:

CORPORATE SAFETY PLAN

Recmediation, Inc. has developed an extensive Corporate Health & Safety Plan. The HASP covers a wide range of topics and is distributed to each employee. The employee is required to read, understand and provide written acknowledgement that they have received the HASP. The Corporate HASP supplements all Site Specific HASPs and Work Plans

SAFETY TRAINING

Our safety training is comprehensive and utilizes various media (visual, audio/video tapes, handouts, etc.). Training includes 40-Hour HazWoper Training, annual 8-Hour HazWoper Refresher Course, Annual Respirator Fit Test, Lead Awareness, Demolition Safety, Asbestos Awareness, Confined Space and other work/trade specific training.

SITE SPECIFIC WORK PLAN & HEALTH AND SAFETY PLAN

A Site Specific Work Plan and Health and Safety Plan are developed for each project. Each plan is reviewed by a corporate safety officer and describes each hazard, as well as appropriate training, equipment and standard operating procedures required to mitigate the hazards. Prior to starting work, the health and safety plan is reviewed by each employee on the project.

PROJECT PLANNING

Extensive project pre-planning includes:

- Conducting required OSHA engineering survey to properly address any potential hazards.
- Research and review MSDS sheets.
- Review of any design or structural drawings

REINFORCEMENT OF SAFETY VALUES

Site Supervisors actively reinforce safety through daily safety toolbox meetings. Each Site Supervisor is given a Manual of Toolbox Talks from which they can utilize on each project.

SAFETY AUDITS & ACCIDENT/INJURY INVESTIGATIONS

Safety audits are held periodically at each project site to evaluate *Recmediation, Inc.'s* health and safety performance and find ways to improve it. Performance is also improved through accident and injury investigation so that preventative measures can immediately be taken.

At times, we also utilize outside safety consultants to provide independent third party evaluation of our Corporate Health and Safety Program as well as onsite auditing of safety implementation on projects.

SAFETY INCENTIVE PROGRAM

Recmediation, Inc. has an active Safety Incentive Program. Our employees are rewarded, not only for production, but also for working consistently safely.

SAFETY RELATED DOCUMENTS

On the following pages you will find these safety related documents:

- **EMR Letter** (*See following page*)
- **OSHA Logs** (*See following page*)
- **Recmediation, Inc. Corporate Health & Safety Plan Table of Contents**
(*A complete copy of our HASP is available upon request*)
- **National Association of Demolition Contractors Safety Manual Table of Contents**

OSHA's Form 300

Log of Work-Related Injuries and Illnesses

Attention: This form contains information relating to employee health and must be used in a manner that protects the confidentiality of employees to the extent possible while the information is being used for occupational safety and health purposes.

Year 2001

U.S. Department of Labor
Occupational Safety and Health Administration

You must record information about every work-related injury or illness that involves loss of consciousness, restricted work activity or job transfer, days away from work, or medical treatment beyond first aid. You must also record significant work-related injuries and illnesses that are diagnosed by a physician or licensed health care professional. You must also record work-related injuries and illnesses that meet any of the specific recording criteria listed in 29 CFR 1904.8 through 1904.12. Feel free to use two lines for a single case if you need to. You must complete an injury and illness incident report (OSHA Form 301) or equivalent form for each injury or illness recorded on this form. If you're not sure whether a case is recordable, call your local OSHA office for help.

Form approved OMB no. 1218-0176

Establishment name Remediation, Inc.

City Jamesburg State NJ

Identify the person **Describe the case** **Classify the case**

(A) Case No.	(B) Employee's Name	(C) Job Title (e.g., Welder)	(D) Date of injury or onset of illness (mo./day)	(E) Where the event occurred (e.g. Loading dock north end)	(F) Describe injury or illness, parts of body affected, and object/substance that directly injured or made person ill (e.g. Second degree burns on right forearm from acetylene torch)	Using these categories, check ONLY the most serious result for each case:				Enter the number of days the injured or ill worker was:					Check the "injury" column or choose one type of illness:				
						Death	Days away from work	Job transfer or restriction	Remained at work	On job transfer or restriction (days)	Away from work (days)	Injury	Skin Disorder	Respiratory Condition	Poisoning	All other illnesses			
(G)	(H)	(I)	(J)	(K)	(L)	(1)	(2)	(3)	(4)	(5)	(M)	(N)	(O)	(P)	(Q)	(R)			
						0	0	0	0	0	0	0	0	0	0	0			
						zero recordables													
Page totals						0	0	0	0	0	0	0	0	0	0	0			

Be sure to transfer these totals to the Summary page (Form 300A) before you post it.

Public reporting burden for this collection of information is estimated to average 14 minutes per response, including time to review the instruction, search and gather the data needed, and complete and review the collection of information. Persons are not required to respond to the collection of information unless it displays a currently valid OMB control number. If you have any comments about these estimates or any aspects of this data collection, contact: US Department of Labor, OSHA Office of Statistics, Room N-3644, 200 Constitution Ave. NW, Washington, DC 20210. Do not send the completed forms to this office.

EQUIPMENT LIST

HEAVY EQUIPMENT

- DH 130 Excavators
- DH 280 Excavators
- DH 330 Excavators
- Cat 450 Dozers
- Bobcats/Skid Steers
- 977 and 983 Track Loaders
- Dynahoes
- 50-ton hydraulic crane
- Attachments – grapples, hammers, and shears for all excavator sizes

We have agreements to obtain any other equipment necessary to complete project (e.g. cranes, manlifts, etc.).

DECON EQUIPMENT

- 10,000 PSI Water Blasters
- High Velocity Water Jets
- Steam Jenny
- Pressure Washers
- Vacuum Trucks
